Comprehensive - a record must be created for every transaction for which evidence is required. Such record must be all-inclusive and carefully created with thoroughness;

Accurate - a record should be correct in all details pertaining to the information or transaction that gives rise to it;

Adequate - a record must be satisfactory or acceptable in quality or quantity for the purposes for which it is kept, and should contain the information necessary to provide evidence of the transaction it documents. Such record should be able to stand alone in providing information or evidence for which it was created for.

Complete and Meaningful – a record should contain sufficient information about the context in which it was created and used e.g. its structure or physical form, linkages to other records, etc.

Understandable and Usable - it must be easy to understand and useable for the purpose it was intended for, with little loss of information;

Authentic – the record, information or data it contains must be undisputed insofar as the origin of the information is concerned;

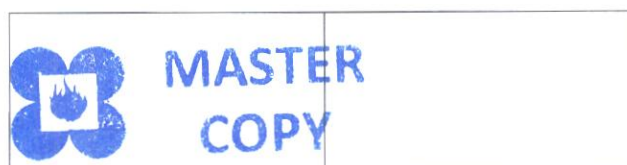

3.2 Records Creation

Records Creation is the phase where a record is brought out to existence. In this phase, the following activities take place:

- Preparation of forms, reports, issuances (letters/correspondences)
- Receipt of information, records, data in paper or other forms of media including electronic records

In the creation of records, the following policies and guidelines shall apply:

- a) Hard copies of quality records must be complete and printed (preferably) in black or blue ink or in any appropriate dark ink color;
- b) Each office/ unit/ division shall keep and preserve a logbook or electronic filing system in which records shall be recorded in chronological order. The logbook shall be in the custody of
